ABSTRACT

This book is a professional practice manual designed to assist clinicians in conducting forensic risk assessment in child maltreatment cases. The authors present up-to-date research findings and provide practical, fact-based information on key issues. The book serves as a reference source on procedural issues, treatment options, and risk management strategies necessary to make high-quality, ethical evaluations. The book also includes a step-by-step guide to conducting and writing quality evaluations, including: components of an evaluation report; forensic versus clinical evaluations; methods of assessment; and assessment domains. (Contains over 400 references.) (GCP)
